

KOLESA CASTORS AND WHEELS

2008

V PROIZVODNEM PROGRAMU
IMAMO PREKO 1600 RAZLIČNIH KOMBINACIJ KOLES
IN VSA SE VRTIJO V ZADOVOLJSTVO
MILIJONOV ZVESTIH UPORABNIKOV
PO VSEM SVETU.

OUR PRODUCTION LINE
CONSISTS OF OVER 1600 DIFFERENT WHEEL COMBINATIONS.
ALL OF THEM SPIN TO THE SATISFACTION
OF MILLIONS OF FAITHFUL USERS
AROUND THE GLOBE.

NAŠA KOLESA SE VRTIJO V VAŠE ZADOVOLJSTVO
OUR WHEELS SPIN TO YOUR SATISFACTION

1	KOLESA ZA SPLOŠNE NAMENE CASTORS AND WHEELS FOR STANDARD USE	10
2	KOLESA IZ NERJAVEČE PLOČEVINE STAINLESS STEEL CASTORS AND WHEELS	34
3	KOLESA ZA KONTEJNERJE CASTORS AND WHEELS FOR MOBILE WASTE CONTAINERS	50
4	KOLESA ZA TEŽJE DELOVNE POGOJE HEAVY DUTY CASTORS AND WHEELS	56
5	KOLESA ZA NERAVNA TLA CASTORS AND WHEELS FOR ROUGH FLOORS	70
6	KOLESA ZA USTANOVE INSTITUTIONAL CASTORS AND WHEELS	80
7	KOLESA ZA POHIŠTVO CASTORS AND WHEELS FOR FURNITURE	86
8	TEMPERATURNO ODPORNA KOLESA HEAT RESISTANT CASTORS AND WHEELS	96
9	POSEBNE IZVEDBE KOLES CASTORS AND WHEELS FOR SPECIAL REQUIREMENTS	100

S tem katalogom vam predstavljamo naš standardni program koles, katerega smo razvijali več let in vanj vnesli naše dolgoletne izkušnje. S stalnim izpopolnjevanjem in uvajanjem novih oblik ter z dvigom kvalitete skrbimo za naš sodoben in kvaliteten asortiman. Vse naše odjemalce bi radi seznanili z nekaterimi, za določitev kolesa važnimi podatki in jim tako pomagali pri pravilni izbiri posameznih vrst koles. Pri tej izbiri vam lahko pomaga tudi naša tehniška služba.

RAZVRSTITEV KOLES

Osnovna funkcijska razvrstitev:

- kolesa brez vilic
- kolesa z gibljivimi vilicami
- kolesa s stabilnimi vilicami

Nadaljnje delitve glede na vrsto vlažajenja, obloge, platišča in pridrte so razvidne iz posameznih tabel.

NOSILNOST KOLES

Pri izbiri koles, glede nosilnosti morate biti pazljivi na naslednje točke:

- Namestitve koles na vozičku in določitev števila K.

K=3

K=3

K=3

$$\bullet \text{ Obremenitev kolesa} = \frac{\text{teža tovora} + \text{teža vozila}}{K}$$

Nosilnosti navedene v katalogu so pridobljene s testiranjem po zahtevah standarda DIN EN 12527 Castors and wheels – Test methods and apparatus, in so vrednosti za dinamično nosilnost pri temperaturi 20°C in drugih pogojih kot jih navajajo standardi glede na namembnost.

Po namembnosti uporabe, kolesa ustrezajo zahtevam vsaj enega od sledečih standardov:

- EN 840-5:2004 Mobile waste containers – Part 5: Performance requirements and test methods.
- DIN EN 12528:1999 Castors and wheels -Castors for furniture – Requirements.
- DIN EN 12529:1999 Castors for furniture – Castors for swivel chairs – Requirements.
- EN 12530:1998 Castors and wheels – castors and wheels for manually propelled institutional applications

This catalog presents our standard program of castors and wheels, which we have been developing for years and where we have capitalized on our long-term experience. Constant perfection and introduction of new shapes and rising quality level guarantee the quality of our up-to-date assortment. On the following pages we would like to propose some technical definitions to help our consumers make the right choice of the most suitable castor or wheel according to purpose of use. Our technical service is always available for further information.

CLASSIFICATION OF CASTORS AND WHEELS

Elementary functional classification:

- wheels
- swivel castors
- fixed castors

Further divisions as regards the type of the bearing, tread, wheel centre and housing are evident from the particular labels.

LOAD CAPACITY OF CASTORS AND WHEELS

When choosing wheels as to their load capacity the following must be considered:

- Positioning the wheels or castors on the vehicle (choose the number K according to the pictures).

K=4

K=3

K=2

$$\bullet \text{ Load per wheel or per castor} = \frac{\text{weight of the vehicle} + \text{load to be carried}}{K}$$

Load capacities in the catalogue have been defined in line with the results of tests performed according to standard DIN EN 12527 Castors and wheels – Test methods and apparatus, these are values for dynamic load capacity at ambient temperature 20°C and other conditions detailed in standards for different purposes of use.

Depending on their purpose of use, castors and wheels are in conformity with one of the following standards:

- EN 840-5:2004 Mobile waste containers – Part 5: Performance requirements and test methods.
- DIN EN 12528:1999 Castors and wheels -Castors for furniture – Requirements.
- DIN EN 12529:1999 Castors for furniture – Castors for swivel chairs – Requirements.
- EN 12530:1998 Castors and wheels – castors and wheels for manually propelled institutional applications

- EN 12532:1998 Castors and wheels – Castors and wheels for applications up to 1,1 m/s (4 km/h).
- EN 12533:1998 Castors and wheels – Castors and wheels for applications over 1,1 m/s (4 km/h) and up to 4,4 m/s (16 km/h).

Večje dinamične obremenitve in trenutne preobremenitve zaradi:

- udarcev
- padcev
- hrapavih ali neravnih tal
- vožnje preko ovir
- višjih hitrosti
- bočnih obremenitev
- višjih oz. nižjih temperatur
- vplivov kemičnih snovi

je potrebno upoštevati pri izbiri kolesa. V teh primerih kolo ne sme biti obremenjeno do nazivne nosilnosti ali pa je potrebno izbrati kolo z večjo nosilnostjo!

KARAKTERISTIKE POSAMEZNIH VRST LEŽAJEV

- **Drсни ležaj:** nezahtevno vzdrževanje, neobčutljiv na udarce, primeren za uporabo v vlažnih prostorih, za manjše hitrosti.
- **Valjni ležaj:** vzdržljiv, nezahtevno vzdrževanje, neobčutljiv na udarce, za manjše hitrosti.
- **Kroglični ležaj:** lahkotekoč tudi pri večjih obremenitvah in hitrostih, primeren za pogosto obratovanje.

KARAKTERISTIKE KOLES IN OBLOGE KOLES

- **Guma:** miren tek in majhne vibracije pri transportu, upor pri vožnji manjši kot pri pnevmatiki.
- **Poliuretan obloga:** visoke nosilnosti, majhna obraba, miren tek, neobčutljiva na ostre kovinske delce, neodporna na vročo vodo in paro.
- **Pnevmatika:** izjemno dušenje udarcev in majhen odpor pri vožnji po neravnem terenu.
- **Poliamid in polipropilen:** neobčutljiv na mokroto in mnoge kisline, sorazmerno velike nosilnosti, primeren za gladka tla.
- **Bakelit:** visoke nosilnosti, temperaturna obstojnost do 270°C. Zelo primeren za peči in sušilnice. Bakelitna kolesa so omejena samo na uporabo po ravnih in gladkih tleh.
- **Litoželezna:** visoke nosilnosti, majhna obraba, visoka temperaturna obstojnost, slabša amortizacija udarcev.

ELEKTRIČNA PREVODNOST

Glede na vaše potrebe izdelamo kolesa, katera so lahko:

- **električno prevodna:** $R \leq 10^4 \Omega$
- **odvajajo statično elektriko:** $10^5 \Omega \leq R \leq 10^7 \Omega$

- EN 12532:1998 Castors and wheels – Castors and wheels for applications up to 1,1 m/s (4 km/h).
- EN 12533:1998 Castors and wheels – Castors and wheels for applications over 1,1 m/s (4 km/h) and up to 4,4 m/s (16 km/h).

Greater dynamic loads and temporary overloads due to:

- strokes
- falls
- rough or uneven floor
- rolling over obstacles
- higher speed
- side impacts
- higher or lower temperatures
- influence of chemical substances

have to be considered when choosing the right castor or wheel. In this case, the castor or wheel must not be loaded up to its nominal load capacity, otherwise you have to choose a castor or a wheel with a greater load capacity.

CHARACTERISTICS OF SPECIFIC BEARING

- **Plain bearing:** simple maintenance, nonreactive to blows, suitable for usage in damp places, for slower speed.
- **Roller bearing:** persistent, simple maintenance, non-reactive to blows, for slower speed.
- **Ball bearing:** easy moved also at greater loads and higher speed, suitable for frequent operation.

CHARACTERISTICS OF TYRE, TREAD OR SOLID WHEEL

- **Solid rubber tyre:** smooth run, small vibrations at transport, resistance while driving is smaller than with a pneumatic tyre.
- **Polyurethane tread:** large carrying capacity, small wear, smooth run, nonreactive to sharp metal splinters, irresistible to hot water and steam.
- **Pneumatic:** extreme damping of blows and little resistance on an uneven surface.
- **Polyamide and polypropylene solid wheel:** nonreactive to moisture and many acids, relatively large carrying capacity, suitable for smooth surfaces.
- **Phenolic solid wheel:** large load capacity, continuous temperature resistance up to 270°C. Very appropriate for bakeries and drying ovens. Phenolic wheels should not be used on an uneven floors (edges, obstacles) or rough floors.
- **Cast iron solid wheel:** large load capacity, small wear, very high temperature resistance, weaker damping of blows.

ELECTRICAL RESISTANCE

In addition to the standard version, the following are available:

- **Conductive castor or wheel:** $R \leq 10^4 \Omega$
- **Antistatic castor or wheel:** $10^5 \Omega \leq R \leq 10^7 \Omega$

OBSTOJNOST NA TEMPERATURO

V katalogu definirane nosilnosti veljajo v temperaturnem območju **Tn**. Vendar pa je delovna temperatura **To** koles lahko višja ali nižja, pri čemer je potrebno upoštevati manjšo nosilnost koles. Nosilnost koles se spreminjanja sorazmerno s spreminjanjem temperature. Za nekatere materiale so dovoljene kratkotrajne višje temperature **Tt**, vendar je pri tem potrebno upoštevati manjšo nosilnost kolesa!

TEMPERATURE CONSTANCY

Castors and wheels load capacity declared in the catalogue is valid in the temperature range **Tn**. The operating temperature range **To** for the wheels can vary, depending on a smaller load capacity. Load capacity is changing in accordance with temperature changes. Some wheel materials temporarily resist to higher temperatures **Tt**, but smaller load capacity has to be considered!

Materiali koles	Materials of wheels	Tn		To*		Tt*	
		T za predpisano nosilnost T for declared load capacity		Delovna temperatura Operating temperature		Kratkotrajna (10 min) višja temp. Temporarily (10 min) higher temp.	
Guma	Rubber	0°C	+30°C	-20°C	+70°C	-30°C	+80°C
Poliuretan (TPU)	Polyurethane (TPU)	0°C	+40°C	-20°C	+80°C	-40°C	+100°C
Poliuretan **	Polyurethane **	0°C	+45°C	-25°C	+55°C	-40°C	+55°C
Polipropilen	Polypropylene	0°C	+30°C	-20°C	+60°C	/	/
Poliamid **	Polyamide **	0°C	+40°C	-25°C	+80°C	-30°C	+110°C
Bakelit	Phenolic resin	-30°C	+270°C	-30°C	+270°C	-40°C	+300°C

* upoštevati manjšo nosilnost !

** na željo uporabnika lahko nekatera kolesa izdelamo iz poliamida ali poliuretana za višje temperature.

* considering smaller load capacity !

** on customer's request some polyamide and polyurethane wheels can be made of high temperature material.

ODPORNOST PROTI KEMIKALIJAM

Oznake pomenijo:

✓ odporno O delno odporno - neodporno

CHEMICALS RESISTANCE

The signs denote:

✓ resistant O partly resistant - non resistant

Vrsta kemikalije	The sort chemicals	Guma Rubber	Poliuretan Polyurethane	Polipropilen Polypropylene	Poliamid Polyamide	Bakelit Phenolic
Etanol	Ethanol	✓	✓	O	✓	✓
Bencin	Petrol	O	✓	O	✓	✓
Benzol	Benzen	-	✓	-	✓	✓
Trikloretilen	Trichloretylene	-	✓	-	O	✓
Toluen in ksilen	Toluene and xilene	-	✓	✓	✓	O
Petrolej	Petroleum	O	✓	O	✓	✓
Mineralna olja	Mineral oils	O	✓	O	✓	✓
Aceton	Acetone	-	O	O	✓	✓
Soliterna kislina 25-50%	Nitric acid 25-50%	-	-	✓	O	O
Kromova kislina 10%	Chrome trioxide 10%	-	-	✓	O	✓
Klorova voda	Chlorine water	✓	-	✓	O	✓
Ocetna kislina	Acetic acid	-	-	✓	✓	✓
Solna kislina	Hydrochloric acid	O	-	✓	O	✓
Žveplena kislina 25%	Sulfuric acid 25%	-	-	✓	O	✓
Lugi	Hydroxides	O	-	✓	✓	O

O vplivu ostalih kemikalij, ki niso navedene v gornji tabeli, se pred nakupom posvetujte z našo tehniško službo!

You should consult our technical service about the influence of the chemicals not cited in the above scheme.

POVRŠINSKA ZAŠČITA

Standardna površinska zaščita kovinskih delov koles je elektro opláčenje s cinkom s transparentno pasivacijo. Odpornost na korozijo je preverjana po standardu ISO 9227: 2006 - Corrosion tests in artificial atmospheres - Salt spray tests.

Ostale možnosti površinske zaščite so še elektro opláčenje s cinkom z rumeno pasivacijo, kromanje, kataforeza (črno) in lakiranje po definiciji RAL lestvice.

SURFACE PROTECTION

Standard coating of metal parts of castors is electro-plated coating of zinc with transparent chromate conversion. Corrosion resistance is tested according to standard ISO 9227: 2006 - Corrosion tests in artificial atmospheres - Salt spray tests.

Other options are electroplated coating of zinc with yellow iridescent chromate conversion, chromium, cathoresis (black) and liquid coating according RAL definition.

VAROVANJE PRED NESNAGO

Pri uporabi koles v tekstilni industriji ali v drugih prašnih prostorih, kjer se zadržuje prah in nesnaga, priporočamo kolesa s pokrovi.

PROTECTION AGAINST DIRT

When using the wheels at the textile industry or in other premises where dust is present, it is advisable to use the wheels with treadguards.

BARVA KOLES

Standardne barve koles so: črna in siva za gumi obroče, zelena in rdeča za obloge koles, natur bela in črna za kolesa iz plastičnih mas. Pri večjih naročilih se prilagajamo željam kupca.

REZERVNI DELI

Rezervni deli vseh naših standardnih koles so vedno na zalogi. Pri posebnih izvedbah koles sledi dobava rezervnih delov po dogovoru.

VZDRŽEVANJE

Občasno preglejte vse pritrdilne elemente in jih po potrebi zatisnite. Kolesa so med sestavo oskrbljena z mazivom za življensko dobo, v kolikor so v uporabi v normalnih pogojih in temperaturnem območju **To** (stran 7). Če so kolesa izpostavljena visokim temperaturam, jih mažemo z odgovarjajočimi mastmi.

Kolesa s pnevmatiko po določenem času izgubijo predpisan tlak, zato jih je potrebno ponovno napolniti.

NAROČANJE

Pri naročanju navedite identifikacijsko (5-mestno) številko artikla, ki enoznačno definira izdelek. Posebne izvedbe koles po želji kupca se definira z opisom.

- Vse mere v katalogu so podane v mm!
- Dobave izvršujemo po prodajnih pogojih, ki so sestavni del našega cenika.
- Prepovedan je ponatis kataloga brez našega dovoljenja.
- Pridružujemo si pravico do tehniških sprememb brez predhodnega obvestila!
- S tem katalogom koles postanejo vse prejšnje izdaje neveljavne.

COLOUR OF WHEELS

Standard colours of wheels are: black and grey for tyres, green and red for treads, natural white and black for solid wheels. With larger orders, colours can be adapted in line with customer's request.

SPARE PARTS

Spare parts for our standard wheels are always in stock. At special production of wheels the deliveries of spare parts follow as agreed.

MAINTENANCE

A periodical control of all housing parts is required, as well as their tightening-up when necessary. Castors and wheels are for life greased when assembled if used in normal conditions and within temperature range **To** (see page 7). If the wheels are exposed to high temperatures, they are lubricated with the corresponding grease.

Pneumatic wheels loose some pressure after a while so they need to be filled up again.

ORDER

When ordering, please state identification (5-digit) number of article which uniquely defines the product. Castors and wheels for special requirements according to customer's needs must be defined by alphabetic description.

- All the dimensions are in mm!
- We make deliveries in line with the sales conditions, which are a constituent part of our price list.
- Reprinting this catalog is not allowed without our consent.
- We reserve the right to make any technical change without prior notice.
- Upon the publication of this catalog, all previous editions become invalid.

7

Posebne izvedbe koles kot variacije na standardna kolesa razvijamo po željah kupcev. Posebne izvedbe varirajo v sistemu zaviranja kolesa ali prirobe (smerna zavora), širine vilic, vgradne višine, dimezije prirobe, lastnosti materialov kolesa, nosilnosti ...

The special solutions as variations of standard castors upon consumer requirements can be developed by given technical description. Special castors vary in braking, locking system (directional locking device), fork width, overall height, top plate dimensions, material properties, load capacity...

A series of 25 horizontal lines spanning the width of the page, providing a template for writing. The lines are evenly spaced and extend from the left margin to the right edge of the page.

NAŠA KOLESA SO SESTAVLJENA
IZ ŠTIRIH RAZLIČNIH MATERIALOV:
GUME, PLASTIKE, ALUMINIJA IN JEKLA.
TE MATERIALE JE MOGOČE PONOVRNO UPORABITI,
ZATO VAM PREDLAGAMO,
DA ODSLUŽENA KOLESA ODDATE
ZBIRALCEM SEKUNDARNIH SUROVIN.

OUR WHEELS AND CASTORS
ARE MANUFACTURED BY FOUR RECYCABLE MATERIALS:
RUBBER, PLASTIC, ALUMINIUM AND STEEL.
ALL OF THEM CAN BE REPRODUCED,
SO WE PROPOSE FOR ALL UNNSSED WHEELS AND CASTORS
TO BE REMOVED TO THE COLECTORS
OF SECONDARY MATERIALS.

LIV KOLESA, predelava kovin in plastike, d.o.o., Postojna
